Alberta Students' Executive Council looks to future priorities amid leadership change

As the long awaited results of the leadership race were announced last night, the Alberta Students' Executive Council looks toward the future of the provincial student movement. Over the last few years, we have cultivated working relationships among the parties and achieved much success.

"We congratulate the new leader and wish her a successful transition in her role. We have high hopes for the province's priorities to invest and advance the post secondary education system. We will continue to work with the Government of Alberta to bring forward the best interests of all learners."

Navleen Kaur

Director of the Board, Alberta Students' Executive Council

There is much to be considered during this transition period. The impending election is top of mind for Alberta students as we look to our advocacy policies. We hope that post-secondary education continues to be a priority for the United Conservative Party as we all move towards post-pandemic economic recovery.

'We are excited to work with the new Premier and will encourage the Government of Alberta to continue to improve the lives of all students in Alberta.'

Dhruv Jani

Director of the Board, Alberta Students' Executive Council

The Alberta Students' Executive Council hopes to continue the working relationship we have with the sitting Government to advance the advocacy priorities of our Membership. Congratulations to Danielle Smith for a 47.7% vote - we look forward to working with you.
